Suggestions for Using

COUNT—COLOR—PLAY

Numbers can be fun with this Help Yourself Activity Book. With its variety of games and devices children can amuse themselves for hours while they develop a readiness and foundation for all future arithmetic experiences.

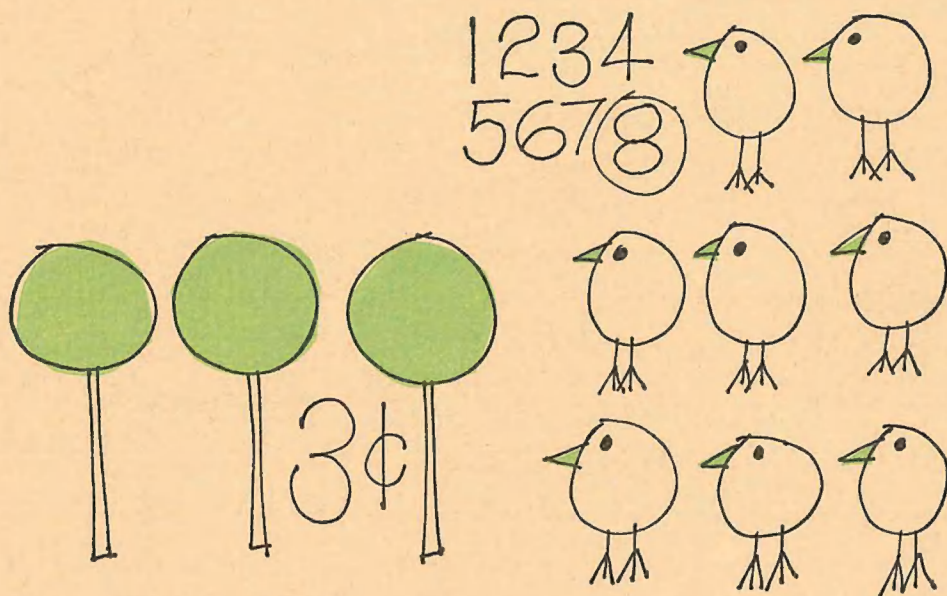

Parents, teachers and children will welcome this attractive book planned by Jan Kiley, a teacher in the primary department of the Shorewood Schools, Milwaukee, Wisconsin. The drawings by Eleanor Dart make the book meaningful. These pictures, as they relate themselves to numbers, will aid children in thinking concretely. This will pave the way for more abstract thinking that they will be required to do as they go on in arithmetic. The pages are perforated for easy removal.

Through games, COUNT-COLOR-PLAY teaches children to count objects and to write numbers correctly and in sequence. Other games will aid them in learning to tell time and to count money.

Children will be able to use most of this book alone. Just be certain that they start at the beginning and proceed through the book one page at a time. When a child asks for help, tell him what he needs to know.

No part of this book may be reproduced or copied in any form without written permission from the publisher.

COUNT-COLOR-PLAY

REVISED EDITION

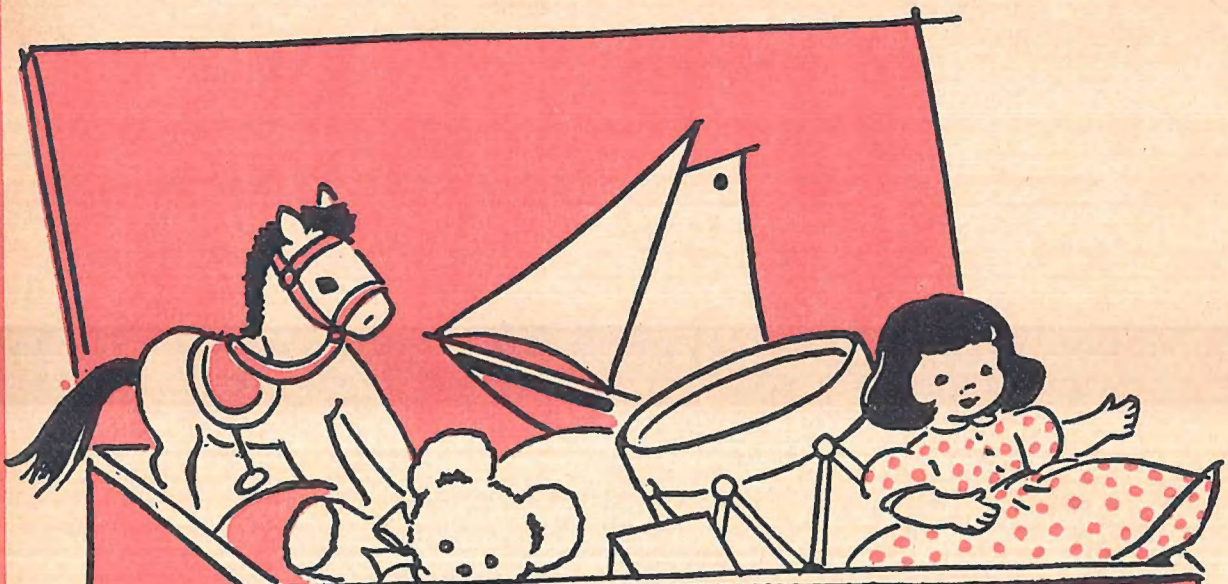

teaches the child to count objects,
write numbers, tell time and count money

Planned by
JAN ALEXANDER KILEY, B.A.

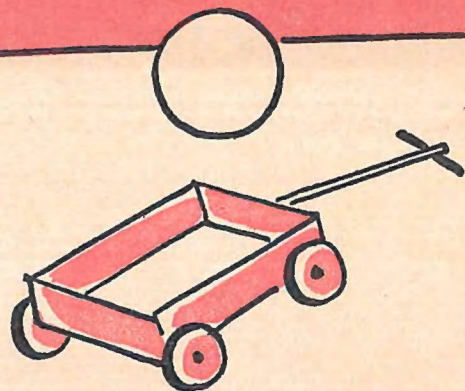

Illustrated by
ELEANOR DART
